SUMMARY

Full Stack Developer building bilingual (Arabic / English) web systems end to end with ASP.NET Core, C#, SQL Server, React, Next.js and TypeScript. Experience across company platforms, admin dashboards, and clinic and inventory management systems. Uses AI-assisted development with Claude Code daily, with Anthropic certifications in Claude Code and the Claude API.

TECHNICAL SKILLS

Backend: C#, ASP.NET Core (MVC, Razor Pages, Web API, Minimal APIs), EF Core, REST APIs, JWT Authentication, Clean Architecture

Frontend: TypeScript, JavaScript, React.js, Next.js, HTML, CSS, Tailwind CSS, Bootstrap

Database: SQL Server, PostgreSQL, Supabase, Data Modeling, Query Optimization

Tools: Git, GitHub, GitHub Actions, Swagger, Docker, Figma

AI: Claude, Claude Code, Prompt Engineering

Also familiar with: Flutter, Kotlin, Adobe XD

EXPERIENCE

Full Stack Developer — Sham Stack — Apr 2026 – Present · Remote

- Built the admin dashboard for shamstack.com: management of projects, team members and site content.
- Developed the contact and messaging flow, from the website form to the team's dashboard.
- Built frontend pages for the bilingual (Arabic / English) website with ASP.NET Core Razor Pages, C#, SQL Server and Tailwind CSS.

Junior Full Stack Developer — Freelance — Aug 2024 – Present · Remote

- Developed web and mobile applications using ASP.NET Core, C#, EF Core, REST APIs, React.js, Next.js and Flutter.
- Implemented responsive interfaces, JWT authentication and Git/GitHub workflows.

Back-End Developer Intern — UNRWA — May 2025 – Jun 2025 · Remote

- Developed backend services and REST APIs with ASP.NET Core and C# for the Al-Haitham educational platform.
- Designed SQL Server databases under the mentorship of Eng. Zakaria Abu Salmiya.

Software Engineer Intern — ByteBloom Academy — Jun 2026 – Sep 2026 · Remote

- Followed a structured study plan in algorithms, clean code, design patterns and software architecture.
- Took part in regular code reviews and team sessions where members presented and discussed book chapters.
- Applied the concepts in collaborative team tasks, including Kotlin development.

PROGRAMS & MENTORSHIP

Software Engineering Mentee — Wasla Connect — Sep 2026 – Present · Remote

- One-on-one mentorship with a senior software engineer at Meta, focused on engineering growth, career development and professional communication.

McKinsey Forward Program — McKinsey & Company — Apr 2026 – Aug 2026 · Remote

- Professional development in structured problem-solving, leadership, communication and adaptability.

SELECTED PROJECTS

Dental Clinic Management System — Full Stack Developer
- Arabic RTL clinic platform built with Next.js, TypeScript, Tailwind CSS and Supabase, including RBAC/RLS, appointments, billing, dental chart and analytics.

Inventory & Sales Management Dashboard — Full Stack Developer · Live demo
- Full-stack dashboard built with React, Tailwind CSS, ASP.NET Core Web API, EF Core and SQL Server, including JWT authentication, inventory, sales and analytics.

Sham Stack Website — Full Stack Developer · Team Project · shamstack.com
- Bilingual company platform with an admin dashboard, built with ASP.NET Core Razor Pages, C#, SQL Server, Tailwind CSS and JavaScript within a team-based Git workflow.

Batikha Media Management System — Frontend & UX/UI · Team · batikha.site Sep 2026 – Present
- Arabic / English internal management system built with Next.js, TypeScript, Tailwind CSS and REST APIs, including authentication and task management.

Future Steps — Full Stack Developer · Live site
- Bilingual (Arabic / English) platform for managing and documenting community initiatives, featuring a program that teaches children in Gaza the basics of AI and prompt engineering. Built with Next.js and ASP.NET Core.

LinkedIn Profile Workshop — Developer & Workshop Presenter · Live site
- Interactive web app used in a LinkedIn workshop I delivered: guides participants through 10 profile-optimization steps with progress tracking and a downloadable completion certificate. Built with HTML, CSS and JavaScript.

Serenity Beauty & Spa Website — Frontend Developer · Live site
- Responsive multi-page website for a beauty and spa salon, including products, membership plans and an appointment booking form. Built with HTML and Tailwind CSS.

Al-Haitham Educational Platform — Full Stack Developer
- Educational web platform built with ASP.NET Core, C#, EF Core and SQL Server, with responsive interfaces and integrated backend functionality.

College Blog Platform — Full Stack Developer
- Blogging platform built with ASP.NET Core MVC, EF Core and SQL Server, with authentication, role-based authorization, articles, comments and categories.

EDUCATION

BSc in Intelligent Systems and Computer Engineering — Al-Aqsa University 2025 – Present

Diploma in Software and Database Technology — Gaza Training College (GTC), UNRWA 2022 – 2025
GPA: 91.62 / 100

CERTIFICATIONS

Anthropic: AI Fluency, Claude Code 101, Building with Claude API	2026
International Trade Centre: AI for Digital Freelancers	2026
Full-Stack Web Development & Data Analysis	2025
Cisco: CCNA Introduction to Networks	2024
PC Maintenance Essentials	2022
